

# *Semi circular ventilation ducts*

The best way of ventilating agricultural products

- High stability thanks to thick sheet metal
- Round openings with less chance of clogging
- Trials in the field confirm ventilation quality

## Thirteen models of TT ventilation ducts are available:

Model	Height* in mm approx.	Width* in mm approx.	Length in mm approx.	Thickness in mm	Weight in kg approx.	Flow-through area in m <sup>2</sup>
TT 1	400	800	870	1,25	12,5	0,25
TT 2	450	900	870	1,25	13,5	0,32
TT 3	500	1000	870	1,25	14,5	0,39
TT 4	550	1100	870	1,25	16,0	0,47
TT 5	600	1200	870	1,25	17,5	0,57
TT 6	650	1300	870	1,25	18,5	0,67
TT 7	700	1400	870	1,25	20,5	0,77
TT 8	750	1500	870	1,25	22,5	0,88
TT 9	800	1600	870	1,50	28,5	1,00
TT 10	850	1700	870	1,50	30,5	1,13
TT 11	900	1800	870	1,50	32,5	1,27
TT 12	950	1900	870	1,50	35,5	1,42
TT 13	1000	2000	870	1,70	42,5	1,57

\* Internal dimensions

The semi circular ventilation ducts are suitable for ventilation of agricultural products, such as potatoes, onions, carrots and tuberous products. The ducts are made of high-quality galvanised sheet steel, which assures a long service life.

### Duct length up to 30 metres

TT ventilation ducts are assembled from thirteen different models. This enables total duct lengths up to 30 metres to be constructed.
